

Appendix 10

Supporting Information & Documentation

Attach information and documentation necessary to support plan content not included elsewhere in the plan or appendices. Examples include, but are not limited to, documentation of animal weights if Agronomy Facts #54 is not used, bedding calculations, calculations for irrigation rates, rainfall additions worksheets, and calculations for manure residual N if using Table 1.2-15.

All operations proposing winter manure application must prioritize fields receiving winter manure application by utilizing the “Winter Manure Application Matrix”, Supplement 10. The matrix for those individual fields where the winter application of manure is proposed must be shown in this Appendix.

When the NMP Spreadsheet is used not for plan development, the CAO Calculation Sheet must be attached. A blank copy of the CAO Calculation Sheet is provided on page 16 of *Supplement 1* and a completed example of the CAO Calculation Sheet is provided on page 42 of *Supplement 2*.
